LITESCREEN®

Litescreen®
Additional Kit Mount

Kit for window frames that do not have a center post (which is necessary to be able to install weather protection).

Litescreen® Additional Kit Mount makes it possible to use the Litescreen on windows that do not have a center post - and it is very easy to install.

Instructions for use

1. The hooks must be attached on each side of the window frame.
2. Do so by either
   a) attach the hooks around the frame or
   b) securely attach each hook at a suitable place using a screw.
3. Assemble the two ends of the strap and tighten.
4. Now the strap works as a post and you can mount the Litescreen as instructed.
